

Material

Corten steel exterior

- Rolled CorTen 3 mm thick
- More sustainable due to its own oxide layer
- Natural appearance and maintenance-friendly

Black-Grey (RAL 7021)

- Rolled Aluminium 4 mm thick
- Corrosion-resistant
- Durable due to galvanisation and powder coating

Tree Dripline Coverings

Exterior

Heavy downpours are becoming increasingly common with an increase in the number of brief extreme downpours, in particular. The number of days with heavy downpours in the Netherlands has even doubled since the 50s. The cause behind this is climate change. Because we are confronted with a rise in temperature, the quantity of water vapour increases. And the more water vapour in our atmosphere, the higher precipitation levels. For every degree of temperature rise, precipitation increases by up to 14% per hour during extreme showers. In this respect, it is important for cities to have appropriate measures in place. 'Urbanisation' presents a big problem here, as it prevents the rain water from seeping /filtrating into the ground. Our sewer system is also not equipped to adequately handle the water excess during extreme downpours. The solution is for the water to infiltrate in places where it is useful for our urban greenery and for the groundwater to be replenished.

It would also be good to buffer all the falling water in green urban areas where possible. That would prevent the streets from becoming flooded and the sewage system from becoming overburdened. The greenery/trees can absorb this water so that the excess water can calmly seep down to groundwater level.

GreenMax has developed special tree dripline coverings for this purpose, which can be placed around tree trunks in hardened surfaces. The channel allows for quick drainage. The tree dripline coverings are available in various designs. The raised edge also provides protection for the tree and reduce the pressure. Tree dripline coverings can also easily be combined with our tree grates.

Available in both black-grey (RAL 7021) and Corten

The patterns shown below are available in all sizes. The patterns could deviate slightly depending on the size. Custom solutions are also possible, please contact us for more information. Tree dripline coverings can be produced in Corten Steel or black-grey

Square- various standard sizes

The patterns are available in all sizes. Tree dripline coverings can be produced in Corten steel ('rust') or black-grey.

Type	Comments	∅ Trunk opening mm	Length mm	Width mm	Height mm	Weight kg
